PSPSIM: A SamCoupé Emulator for PSP v1.0.4

Hi All,

Here is a new version of PSPSim the SamCoupé Emulator for PSP.

For those who haven't seen previous versions, SimCoupe emulates a SAM Coupe - an 8-bit, Z80-based home computer released in 1989 by Miles Gordon Technology.
For more information on the machine itself, including history and technical specification you can go on the SimCoupe web site.

What's new in version 1.0.4 :

- New graphical functions with new smoother render modes.
  It uses the PSP GPU for rendering, it does not run faster,
  but it's a lot smoother.
- Multiple keyboard mapping feature (Thanks to Pou-chan) :
  You can now toggle between three differents keyboard mapping using
- Bug fix in Rom file requester
- Add help menu

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license,
read COPYING.txt file for more information about it.

pspsim-v1.0.4.zip

  Enjoy,

      Zx.

If you want to discuss on this emulator, you can do it there :
zx81's forum on dcemu network or zx81's forum on qj.net
