## **GP2X-THOM: A TO7-70 emulator for GP2X v1.0.1**

Hi All,

Thom is one of the best emulator of the Thomson TO7 home computer running on MacOS, Windows and Unix.

It has been initially written by Sylvain Huet in 1996 (see <http://www.sylvain-huet.com>), then Eric Botcazou (see <http://nostalgies.thomsonistes.org/>) continued this project and added many new features.

Here is a port on GP2X of the version 1.1.5, that i had previously ported to PSP.

How to use it ? Everything is in the README.txt file.

If you're looking for games and software have a look here :  
to7-70 games

Here is a full working binary version :  
thom-v1.0.1-bin.zip

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :  
<http://www.gp32x.com/> or dcemu network

Hi Zx. The link isn't directing to the file. <http://zx81.zx81.free.fr/public/gp2x/thom/thom-v1.0.1-bin.zip>  
This should be the one I guess

Thanks for porting this emu to the GP2X.

Oops, thanks, it's fixed now

Take care,

Zx

Great news; will try the release today!

We've added a link to [www.linuxlinks.com](http://www.linuxlinks.com) to help spread the word.
