## **GP2X-ZX81: A Sinclair ZX81 emulator for GP2X v1.0.1**

Hi All,

XZ81 is an emulator of the Sinclair ZX81 computer running on Unix systems.  
It has been written by Russell Marks in 1995.  
See <http://rus.members.beeb.net/> for further informations.

Here is a port on GP2X of the version 2.1 that i had previously ported to PSP.

How to use it ? Everything is in the README.txt file.

If you're looking for a manual or documentation for the zx81 itself have a look here :  
<http://www.zx81kit.com/>

If you're looking for games and software have a look here :  
<ftp://ftp.nvg.ntnu.no/pub/sinclair/>

Here is a full working binary version :  
[zx81-v1.0.1-bin.zip](#)

And the source code :  
[zx81-v1.0.1-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :  
<http://www.gp32x.com/> or dcemu network

Posted by zx-81 in Sinclair at 19:41

50% of the time I get black screen. (hang on startup).  
The other times it is ok.  
Maybe my gp2x has some hardware problem.

The TI99/4 can only see the splash screen before going to the gp2x menu.

The CPC emulator is started up ok everytime.

maybe my sys is faulty.

thks
