GP2X-ZX81: A Sinclair ZX81 emulator for GP2X v1.0.1

Hi All,

XZ81 is an emulator of the Sinclair ZX81 computer running on Unix systems. It has been written by Russell Marks in 1995. See <http://rus.members.beeb.net/> for further informations.

Here is a port on GP2X of the version 2.1 that i had previously ported to PSP.

How to use it ? Everything is in the README.txt file.

If you're looking for a manual or documentation for the zx81 itself have a look here : <http://www.zx81kit.com/>

If you're looking for games and software have a look here : <ftp://ftp.nvg.ntnu.no/pub/sinclair/>

Here is a full working binary version :
[zx81-v1.0.1-bin.zip](#)

And the source code :
[zx81-v1.0.1-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here : <http://www.gp32x.com/> or dcmu network

Posted by zx-81 in Sinclair at 19:41

50% of the time I get black screen. (hang on startup).
The other times it is ok.
Maybe my gp2x has some hardware problem.

The TI99/4 can only see the splash screen before going to the gp2x menu.

The CPC emulator is started up ok everytime.

maybe my sys is faulty.

thks
