PSP-PDA v1.3 with IR keyboard support !

Hi all,

Here is a new release of PSP-PDA, the PDA applications for PSP.

For those who haven't seen previous versions of this great peace of homebrew, PSP-PDA is a set of PDA programs including notepad, music player, image viewer, address book, calendar, calculator, and clock.

It has been written by Rob_psp. It is distributed under GNU licence, and sources are provided.

My contribution to this projet is MINOR, all credits should remain to Rob_psp !

What's new then ? it now supports IR-keyboard !

The IR keyboard part has been tested using a Targus Universal IR Wireless keyboard.

How to use it ? Everything is in the README.txt file.

psppda-v1.3.zip

Enjoy,

Zx.

If you want to discuss on this emulator, you can do it there :
zx81's forum on dcemu network or zx81's forum on qj.net

Posted by zx-81 in PDA at 22:41

Excellent work, thank you very much. this app is on of the best, another zx-81 homebrew to my memory stick collection,

thanks
Jordan on Jun 18 2007, 02:11

Thanks for your kind comment,

Cheers, Zx
zx-81 on Jun 18 2007, 09:07

Nice one, zx.

Now I can sketch out code without moving over to my workstation
lpopman on Jun 18 2007, 14:02

NICE ONE!!!
Would be more perfect if you could implement the Danzeff virtual keyboard?

tHX
TinyTony on Jun 18 2007, 15:02

hey can you list or make a read me so I know the controls so I only have to use my ir keys because my buttons are messed up
thankyou very much

Cosito on Jun 18 2007, 15:17

Blog Export: ZX-81's web site, <http://zx81.zx81.free.fr/serendipity/>

I read the read me file and followed the instructions but still it says this game could not be started. please help.
fahad on Jun 18 2007, 15:21

very good homebrew.

But some bugs:

When I want to change theme (main menu), there is un "psp crash". Same thing when I want to see week events in the calendar.

Thank you, congratulations!

I hope next version will give us some languages (I can help for french) and I hope we can read .pdf and .doc
Wolfodeiwofly on Jun 18 2007, 17:40

hi

There is a readme file in the zip archive

Zx
zx-81 on Jun 18 2007, 19:21

Yes, you're right , may be one day

Zx
zx-81 on Jun 18 2007, 19:22

You have to put it in the game150 directory if you're using a custom firmware, or in game directory if you have a 1.5 fw.

This homebrew can't be started with an original Sony firmware (until 1.5)

Zx
zx-81 on Jun 18 2007, 19:24

hey one thing could you add a font changer or a guide on how to change fonts becuae I tried and nothing it crashes.
Cosito on Jun 18 2007, 22:15

It's the same with the theme manager, it saves the new configuration and then crash. But when you restart the apps, the new theme is active. I will fix it in next release,

Zx
zx-81 on Jun 18 2007, 23:25

ok thanks.

-cosito-
cosito on Jun 18 2007, 23:28

in notepad mode when I press ESC on the Targus keyboard, it always reacts to be a " " (space function), while I can't type anything, though Tab, Enter ArrowKeys are functioning well.

In the Basic pikey sample, when pressing 1, it only shows "pressed scancode: 2" Is this normal?
Lex on Jun 19 2007, 00:08

hold select when the psp SCEA screen comes up that should fix the problem.
cosito on Jun 19 2007, 00:23

In addition, if I move the Square one the vitural keyboard in PSP-PDA to, for example "e", then pressed ESC on Targus, it will type "e"...should I remap something?

Could you help me?

Lex
Lex on Jun 19 2007, 00:24

If you need an extra pair of eyes to track down any bugs, let me know, and I'll go through the source. (I am a C coder with plenty of experience, several unreleased psp apps to help me with my retro computer collection (cassette emulation for zx80,zx81,zx spectrum etc))
lpopman on Jun 19 2007, 00:31

this psp-pda could not be started in my 3.40oe psp

its a fantastic application Zx - thanks!

ever used Freemind the mindmanaging software on linux/windows? it would be incredible to have that app on the PSP.
Peter on Jun 19 2007, 10:07

lol, it could be fun, but i think the psp screen is a bit too small for such apps,

Take care, Zx
zx-81 on Jun 19 2007, 13:05

It's working now, thanks a lot!
Though I don't get the reason of pressing Select can help XD

Anyone to explain?
Lex on Jun 19 2007, 19:28

I've modified this homebrew as less as possible, and it behaves like this in the original version ...

Zx
zx-81 on Jun 19 2007, 20:50

HI will this run with PSP FW 2.60?
venkat on Jun 20 2007, 10:10

I haven't tried, but you will have first to convert the kxploit 1.5 EBOOT to 2.0.

Anyway why do you stay in 2.6 fw, when 3.0x-OE firmwares are so good ??? I suggest you to downgrade to 1.5, then upgrade to custom firmware,

Zx
zx-81 on Jun 20 2007, 11:27

I've been trying to get the Targus IR keyboard to work with pspPDA but without any luck whatsoever. Do I need to copy over any drivers or do anything else other than extract the zipped files to PSP->Game ?
Rufus on Jun 20 2007, 21:18

Nevermind. The IR signal is either extremely weak or my Targus battery is low. Does your Targus keyboard require the IR antennae to be nearly touching the psp?
Rufus on Jun 20 2007, 21:33

It works fine at about 10 centimeters from the keyboard ...

Zx
zx-81 on Jun 20 2007, 22:15

It would be a very useful app if it didn't keep crashing all the time... at least on my 3.52 M33-2 PSP it's unstable as hell.
Arrowflash on Aug 19 2007, 00:54

thanks for your comment. Try to use the latest version, it should be better. Can you give me some more details, what did you do before it crashed etc ...

Zx
zx-81 on Aug 19 2007, 19:34

is there going to be a version for fw3x ?
darklion on Dec 2 2007, 01:48

Hi,

Thanks for your comment . Yes i've added it in my to-do list,

Cheers, Zx
zx-81 on Dec 2 2007, 10:54

i have a 3.71... doesn't work.
*sigh
Dark_naruto on Jan 8 2008, 07:28

Plese, Zx release a new version for PSP Slim
its a very good homebrew.

R_R on Feb 19 2008, 23:30

For some reason the clock on the app is wrong by one hour. I can't even switch area or even put in my own. I'd also like the ability to read(maybe write) .doc, .pdf, and others. I would also like an easier button layout like for going back why not use circle like the psp and x to select/view in address book (rather than x for a new person). And overall just a redo of the whole visual layout (like a menu rather than a button guide in address book) and configure to make it easier. I know its a lot to think about, but it would be very much welcomed. Thnx for the app anyway

dv7035 on May 30 2008, 03:24

It keeps saying it is corrupted PLEASE HELP!!!!!!!!!!!!!!!!!!!!

TROY` on Aug 8 2008, 00:51

Please reply i really need help here. It says its corrupted. My psp is system software 4.01 m33-2 so please tell me what to do.

Miss D on Feb 12 2009, 07:26

it says corrupted because you didn't go down to the program file...i wish this worked with pikey...wonder why psphugo does and this doesn't ?

BLAINE on Apr 14 2009, 17:37
