PSPIRC: IRC Client for PSP v1.0.5 * UPDATE *

** UPDATE ** : The version i have uploaded on my web site yesterday was buggy, i've uploaded a new version just now. sorry for inconvenience.

Hi All,

PSPIRC is a basic IRC client for the PSP (see Internet Relay Chat).

 What's new in this version ?

- Support iso-8859-1 characters in IRC console for West European languages
  (characters such as à, é, è ... are now printed properly instead of a white space)

- Bug fix in console display

 Credits and license :

It is mainly based on the IRC engine written by Danzel, and the user interface i wrote for PSPSSH.

The IR keyboard support is based on the work of Harald Fielker (author of the PSP IR Keyboard Library) with a new patch from Craig to support Sprint PCS IR keyboard.

This software is distributed under GNU V2 License, see GPLV2.txt file for all details and information about it.

It has been developed on linux for Firmware 1.5 and 3.40-OE, and for the IR keyboard part it has been tested using a Targus Universal IR Wireless keyboard.

How to use it ? Everything is in the README.txt file.

 Download :

A binary version for firmware 1.5 is available here :
pspirc-fw15-v1.0.5.zip

A binary version for firmware 3.x-OE is available here :
pspirc-fw3x-v1.0.5.zip

Sources are here :
pspirc-src-v1.0.5.zip

Many thanks to Danzel for his Virtual kerboard and his IRC stuff, and to all PSPSDK developpers.

Special thanks to HookBott for graphics, splash screen and icons, and to Craig for his Sprint IR keyboard driver.

 Enjoy,

     Zx

If you want to discuss on this emulator, you can do it there :
zx81's forum on dcemu network or zx81's forum on qj.net

HAllo ZX81.
Je suis mIRC-Freak et n'ai pas « un Mirc-Script » toutefois pour ceux psp mais pour l'ordinateur écrit. comment trouves-tu l'idée « RSS-FEEDS » insérer ?
Cela a aussi inséré dans mon mIRC-PSP et est véritablement utile lui. Tu as peut-être une envie. je peux te donner le code pour cela. psp je ne peux pas insérer dans ceux. homebrew. moi zéro plat prx. si tu veux s'annonçais simplement.

You need a custom firmware 3.71-m33 v2 (for example) to be able to run this homebrew (as all others),

btw, i suggest you to install latest version of pspirc (v1.1.0)

Zx
