### AFKIM: Instant Messenger for PSP v3.3.1 (latin1)

Hi all,

Here is a new release of AFKIM (Away From the Keyboard Instant Messenger), the instant messaging application for PSP written by Danzel !

My contribution to this projet is still MINOR, all credits should remain to Danzel  
(see <http://localhost.geek.nz/>)

What's new then ?

- Add iso 8859-1 font/characters compatibility (useful for french, spanish, german etc ... )
- Add modified version of Danzeff Keyboard with iso 8859-1 characters
- Code cleaning

Have a look to the file README-irkbd.txt for mapping informations etc ...

The IR keyboard part has been tested using a Targus Universal IR Wireless keyboard.

afkim-v3.3.1-fw3x.zip

afkim-v3.3.1-src.zip

**\*\* UPDATE \*\*** : Here is a fw 1.5 version

afkim-v3.3.1-fw15.zip

Enjoy,

Zx.

If you want to discuss on this emulator, you can do it there :  
zx81's forum on dcemu network or zx81's forum on qj.net

Do you think it would be possible at all to play mp3's while messaging? (Say press select, which could be the gateway to a basic mp3 player) That would be, in my opinion, the ultimate feature----easy and included within the program---would that be possible?  
Oliver on Sep 17 2007, 03:50

your afkim freezes when it hits identify i tested it with both my psp's and with someone over at psp-hacks it doesnt work and for the pst  
oliver just use music prx plugin .55 allows you to play music with everything use google and look it up  
Raul tejeda on Sep 17 2007, 09:20

Thanks for your feedback, i will have a look on this issue,

Cheers, Zx

I'm spanish and I thank you very much the latin1 compatibility.

But I have problems:  
When I try to type a '?' from the 'opq?' square, I get a '|'.  
'del' doesn't work from the numbers panel.  
When I try to type a '@' from the R key panel, I get a '\

Running on PSP Slim & Lite 3.60 M33.

Thank you.  
Razorblade on Sep 17 2007, 17:14

I've uploaded a new version yesterday (same name, and same location), where this issue is fixed.

Regards,

Zx

Hi,

Thanks for your great program for my PSP, I downloaded this 2 days ago, 10th Oct but I still have the same issue as Razorbladell.  
Just wanted to let you know

Thanks  
Jacky on Oct 14 2007, 14:45

hi i have psp 3.0 oe-a  
and i installed afkim with mp3  
but idk how to get the mp3 files working??  
please help  
jt on Nov 22 2007, 19:22

I really don't know,

Zx  
zx-81 on Dec 16 2007, 19:55

What version does it have to be in? My psp is on version 3.90  
Estevan on Feb 12 2008, 07:23

You have to install a custom firmware ... Official firmware don't support homebrew ,

Zx  
zx-81 on Feb 12 2008, 09:00

when i try to delete invalid(inccorect logins) i cant delete them and i just freeze up  
Charles on Feb 29 2008, 05:53

You may try to connect to bitlbee using a chat client (xchat or any other good IRC client), and manage your list using IRC commands.

I think I've tried everything just to try to get this program running, but all my attempts were fruitless. The furthest I get to is enabling AFKIM through the XMB, then all I get is a black screen and am taken back to the XMB.

I run CFW 3.80m33-5 w/ 1.50kernel enabled

I tried downloading AFKIM for 3.3.1-fw3xm, and tried running with both 3.80 and 1.50 kernel, nothing worked. Placed afkim folder into PSP/GAME, and PSP/GAME380, nothing worked.

I tried downloading AFKIM 3.3.1-fw15, and ran with 1.50kernel. Placed the two 3.3.1-fw15 folders in PSP/GAME amd PSP/GAME150, nothing worked.

Is there anything I haven't tried? I didn't think installation would be this difficult! I have piKey, but all of its plug-ins are disabled when I try running AFKIM. I got PSPWrite to work, with the help of Zx (thank you), didn't think I would have a hard time with AFKIM =(  
Rich on Mar 16 2008, 19:26

Hi Dude,

Thanks for your feedback. That's why i stay in 3.71 ...

Zx
