PSP2600: Atari 2600 emulator for PSP v1.0.5 *SLIM*

Hi All,

For those who has missed the beginning, Stella is on of the best emulator of Atari 2600
game console, running on many different systems, such as Linux, Solaris, Windows,
MacOS/X, WinCE, OS/2, GP2X.

It has been written initially by Bradford Mott, see Stella site for details.

PSP2600 is a port on PSP of the version v2.2 of Stella. It's based on the work
of Aenea   who was the first to port Stella to PSP, and David Voswinkel
who's now in charge of the PSP port in Stella team.

It has been developped on linux for Firmware 3.x-OE and for PSP-slim.

What's new in this version ?

- Compatible with custom firmwares 3.x and PSP-slim
- Add a simple intro splash screen
- Support iso8859-1 fonts in print text functions
  (might be useful to translate psp2600 menus in german, french ...)
- Bug fix in file requester

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license,
read COPYING.txt file for more information about it.

** Many thanks to Pakos210 for the PSP-slim test **

psp2600-v1.0.5-fw3x.zip

psp2600-v1.0.5-src.zip

 Enjoy,
        Zx.

If you want to discuss on this emulator, you can do it there :
zx81's forum on dcemu network or zx81's forum on qj.net

Hello - I apologize for being repetitive - But I just noticed this version for fw3.X - I installed it and it also does not seem to support ZIP
files - I also updated to the latest version of PSP7800 for fw3.x and this one works fine with zip files... Also, I noticed that ALL of the
emulators out there (including yours) are working with my NON-SLIM M33's 3.52-OE-4 firmware... I find that labeling these wonderful
emulators as "SLIM" can be misleading and deter many to not upgrade if they dont have a SLIM... THANK YOU FOR YOU
WONDERFUL EMULATORS!!
   Grog Argh on Sep 18 2007, 05:07

Thanks for your comment. About the zip file issue, i will have a look on it. For the custom fw / slim comment, it has been tested on psp
slim, but yes it works also on psp fat using custom firmware 3.x-OE or M33,

First, let me reiterate what Grog Argh said, thank you dearly for porting these emulators to the PSP. It is very much appreciated.

I also agree that the "slim" part should be removed from the splash screen, but thankfully you release the source code so I'll just modd it myself.

Thanks for your kind comment, btw i suggest you to use the latest version (not this old one)

Take care,

Zx
