## **GP2X-Write: A Text Editor for GP2X v1.0.2**

Hi All,

Here a new version of gp2x-write the text editor for GP2X.

For those who haven't seen previous release, it permits to edit even huge text file, in both dos and unix mode, using iso8859-1 (8bits) characters encoding. All iso8859-1 characters are present in the "Danzeff like" virtual keyboard.

What's new then ?

- Two cursor modes :
  - . the cursor move only on already written text (useful to edit existing text file)
  - . the cursor can move everywhere (useful to display existing text file)

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

write-v1.0.2.zip

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :  
<http://www.gp32x.com/> or dcemu network
