### GP2X-GNU Chess: Chess game for GP2X v1.0.1

Hi All,

GNU Chess is command line Chess program running on many different systems such as UNIX, windows or MacOS. It was started in 1986 by Stuart Cracraft, who is continuing to develop it with other coders such as Chua Kong Sian, Lukas Geyer, Simon Waters and David A. Wheeler.

GP2X Gnu Chess use the GNU Chess version 5.07 for the Artificial Intelligence, and i've added a Graphical User interface.

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

Here is a full working binary version :  
gchess-v1.0.1-bin.zip

Here is the source code :  
gchess-v1.0.1-src.zip

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :  
My forum on dcemu network or <http://www.gp32x.com/>.

Gooooood! I have been waiting so long for strong chess game for PSP. You make it! Thank You. My english is very poor sorry... My dream is port other, stronger chess engines for PSP: Fruit, Glaurung, etc. Maybe Pahalax ? It's engin has very attractive style play  
Best Regards. Sedar  
Sedar on Nov 26 2007, 14:45

Hi Sedar,

Thanks for your comment. For the other chess engine, may be one day, but for the moment one is enough for me .
