## **PSPCAP32: Amstrad CPC Emulator for PSP v1.3.2**

Hi All,

Here is a new version (final ?) of PSPCAP32 the CPC Emulator for PSP.

For those who haven't seen previous versions, Caprice32 is one of the best emulator of the Amstrad CPC home computer series running on Windows and Unix, written by Ulrich Doewich. This emulator faithfully imitates the CPC464, CPC664, and CPC6128 models (see caprice32 project)

What's new in version 1.3.2 :

- Option to display in green (monochrome)
- Option to scroll up or down the screen (when the screen is not properly centered)
- Analog pad can now be used in the file requester to move faster through the disk/snapshot lists
- Check CPM disk automatically (and run |CPM instead of RUN")
- Bug fix in the disk explorer menu (when the number of files on disk was too high)
- IR keyboard works now also in the keyboard settings menu.
- Bug fix in the render function, sometimes the screen became dark (it should not happen anymore).

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

`pspcap32-v1.3.2-fw3x.zip`

`pspcap32-v1.3.2-fw15.zip`

`pspcap32-v1.3.2-src.zip`

Thanks to Gryzor you can find here a set of snapshots.  
If you look for disk images you can find most of them here

Want to know which games are good ? here is a good site !

Enjoy,

Zx.

Hi Ludovic,  
Thanks for the release, I am downloading it right now & am going to spend some time toying with it. The changelog is awesome (thanks for the screen adjustment option) & should fix pretty much every remaining issues.  
Cheers,
