GP2X-SIM: A SamCoupé Emulator for GP2X v1.0.2

Hi All,

SimCoupe emulates a SAM Coupe - an 8-bit, Z80-based home computer released in 1989 by Miles Gordon Technology.
For more information on the machine itself, including history and technical specification you can go on the SimCoupe web site.

Originally developed for UNIX and DOS systems by Allan Skillman, it has been then improved and ported to SDL by Simon Owen, Dave Laundon.

GP2X-SIm is a port of the CVS version 0.90 beta 4 of SamCoupe.

What's new in this version ?

- major speed improvements !

How to use it ? Everything is in the README.txt file.

Here is a full working binary version :
sim-v1.0.2-bin.zip

And source code :
sim-v1.0.2-src.zip

  Enjoy,

       Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

ZX81 you have made a MIRACLE!!!!!!
The SPEED in incredible also to 200 Mhz!!!!!
 Marvelous release, you are a great coder.
The volume regolation don't work, i hope wich you fix this problem.

The more great emu for SAMCOUPE is only on GP2X THANK YOU!!!
