GP2X-MSX: MSX Emulator for GP2X v1.1.0

Hi All,

fMSX is a famous emulator of the MSX, MSX2, and MSX2+ 8bit home computers. It runs MSX/MSX2/MSX2+ software on many different platforms including Windows and Unix. See <http://fms.komkon.org/fMSX/> for further informations.

It has been first written by Marat Fayzullin, and later Vincent van Dam ported it on SDL.

GP2X-MSX is a port on GP2X of the version 2.7.0.40 of fMSX-SDL from Vincent van Dam that i had previously ported to PSP.

What's new in this version ?

- Speed improvements
- Add gzipped disk file support, reduce disk file size from 700k to 50k ! (you may gzip original dsk file using www.7-zip.org)
- A thumbnail image is now displayed in the file requester while selecting any file with the same name of a previously saved game (rom, disk, keyboard, settings). It might be very helpful to recognize that game later if you have thousand different games on your disk and rom folders !
- In the emulator menu you can go directly to keyboard and settings menu using the L-Trigger key.
- The virtual keyboard is now usable in the file requester menu to choose the first letter of the game you search !

How to use it ? Everything is in the README.txt file.

Here is a full working binary version :
[msx-v1.1.0-bin.zip](#)

Here is the source code :
[msx-v1.1.0-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
<http://www.gp32x.com/> or dcemu network

I love your PSP and GP2X MSX emulators.. Have you considered porting one to the Wii?!!!!
Jay on Sep 15 2008, 19:16

Hi Dude,

Why not one day, if it hasn't been already ported,

Zx

Hi Zx-81. Great emu's for GP2X, but it's been a long time since your last updates, will you be doing any more updates to your GP2X emu's for speed increases up to 60fps?
hirolaser on Oct 21 2008, 23:13

Hi,

i plan to release a new version soon (when i will have finished the psp version)

Zx
