GP2X-Chess: Chess game for GP2X-F100 v1.1.0

Hi All,

GNU Chess is command line Chess program running on many different systems such as UNIX, windows or MacOS. It was started in 1986 by Stuart Cracraft, who is continuing to develop it with other coders such as Chua Kong Sian, Lukas Geyer, Simon Waters and David A. Wheeler.

GP2X-Chess uses the GNU Chess version 5.07 for the Artificial Intelligence. It has been developped and tested on GP2X-F100 with FW 4.1.0

What's new in this version ?

- Share the code for both Wiz and GP2X-F100 version
- Improve menu navigation using joystick
- New background images

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

Here is a full working binary version :
gchess-v1.1.0-bin.zip

Here is the source code :
gchess-v1.1.0-src.zip

Enjoy,

Zx

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or <http://www.gp32x.com/>.

Hi:

I'll do a new skin for gp2x. If you want it to add for default email me:

getter_shine(a)hotmail(dot)com

Hi,

With pleasure, i can then add it in the archive, if someone want another skin

Cheers, Zx

Here you have:

<http://dl.openhandhelds.org/cgi-bin/wiz.cgi?0,0,0,0,50,197>

If you include it in some new version of your port, you make me happy XD.
Exclamation on Aug 27 2009, 02:19

Hi,

I've added your skin in the wiz chess post, Thanks

Zx
