Wiz-7800: Atari 7800 emulator for Wiz v1.1.0

Hi All,

ProSystem is the best emulator of Atari 7800 game console, running on Windows system.
It has been written by Greg Stanton, see Greg Stanton web site for details.

Here is a port on GP2X-Wiz of the version i've previously ported to PSP.

Many new features have been added compared to GP2X-F100 version.
Here is a copy of the changelog :

- Cheat support !
- New background images
- Text editor to write your own comments on games
- Text editor to modify the global cheat.txt file
- Display first comment line while browsing game files
- Memory monitoring engine to find your own cheat code !
- Improve file requester with virtual keyboard to choose
  sequentially rom files beginning with a given letter
- Add documentation for settings in help menu
- A thumbnail image is now displayed in the file requester
  while selecting any file with the same name of a previously
  saved game (rom, keyboard, settings).
  It might be very helpful to recognize that game later if you
  have thousand different games on your disk and rom folders !

Here is a full working binary version :
wiz7800-v1.1.0-bin.zip

Here is the source code :
wiz7800-v1.1.0-src.zip

  Enjoy,

      Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

Hi Man you've done great work with AFKIM but i have one sugestin, if you could add to the attached file at the link
http://odsiebie.com/pokaz/5556868—142e.html compatibility with keyboard ir.
I think allmost every kid in Poland will be greatfull about that, and then you can count for donation realy !!

thanks and take care …

sorry for my english

love your emulators!!!! wonderful work!
I wanted to report a small bug. Sometimes when I exit the emulators on the wiz to return to the screen, after I press "x" to confirm exit, I just hang at a black screen and never regain control of the wiz. Basically hanging on exit. This has happened in another emulator of yours, i forget which, but it must be shared code. Anyway, just wanted to share that. THANKS FOR ALL YOUR HARD WORK!!!!!
Happy Wiz user

Hi Jay,

Thanks for your feedback. I've encountered this bug myself but for now i just can't figure out what is going on ...

Thans,   Zx
