Wiz-Atari : Atari 800/130/5200 Emulator for Wiz v1.1.1

Hi All,

Atari800 is an emulator for the 800, 800XL, 130XE and 5200 models of the Atari personal computer. It can be used on console, FrameBuffer or X11. See <http://atari800.sourceforge.net/> for further informations.

Wiz-ATARI is a port of the PSP version to GP2X Wiz.

Many new features have been added such as cheat codes and save states with thumbnail images etc ...

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

UPDATE: a small bug has been fixed in original atari emu (v1.1.0 has been replaced by v1.1.1)

Here is a full working binary version :
[wizatari-v1.1.1-bin.zip](#)

Here is the source code :
[wizatari-v1.1.1-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcmu network or <http://www.gp32x.com/>.

Good work! I using this emulator on PSP and Wiz, and on both is working good, but on both systems i have problem with sound - in some games/demos music is full of noise (like it's overloaded). I know this problem is on Dingoo version. Can you fix this bug in next versions?
