Pandora-X48: a HP48 Calculator emulator v1.0.1

Hi all,

X48 is an unix emulator (under X Window) of the famous HP48 GX calculator.
It has been written many years ago by Eddie C. Dost in C langage.

I've sucessfully modified and port the source code of the 0.4.0 version using Pandora environment. It's now working fine on Pandora, using a new layout to fit pandora screen width.

The package is under GPL Copyright and sources are included.

Pandora X48 v1.0.0 binary version only

Pandora X48 v1.0.0 sources

The HP48 documentation is there : user guide

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or <http://www.gp32x.com/>.

Love it.

My only suggestion would be a true fullscreen mode, taking out the top menu bar, and extending over the Pandora lower menu bar.
If the calculator were scaled accordingly, the keys would be a bit bigger, making finger typing on the screen much easier.

Thanks for the RPN!!!!

j.

Hi !

Nice, didn't know that you updated the port.
PLz is it possible that you upload a .pnd to the repo plz ?

Cheers !

Hi Swat,

The PND is available in the link on my post. There is no other update as far as i know,

Zx
