Pandora-TI92: A TI-92 Calculator emulator v1.1.1 [UPDATE]

Hi all,

XTiger is an unix emulator (under X Window) of a TI-92 calculator (Texas instruments). It was originally written by Jonas Minnberg and was closed source. Jonas Minnberg has not worked on XTiger for quite a while and he gave Misha Nasledov the code and permission to GPL it.

Here is a port on Pandora of the version i've previously ported to GP2X-Wiz and Dingoo.

The package is under GPL Copyright and sources are included.

Many TI92 stuff can be found on the following urls :

<http://www.ticalc.org>, and on the texas instruments web site <http://education.ti.com>

Here is a PDF version of the manual : <http://www.smendes.com/ti89.pdf>

**** UPDATE ****** Several keys didn't work properly in previous version v1.1.0

Here is a full working PND version :
[pandora-ti92-v1.1.1-pnd.zip](#)

Here is the source code :
[pandora-ti92-v1.1.1-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or <http://www.gp32x.com/>.
