## Pandora-2600: Atari 2600 emulator for Pandora v1.1.0

Hi All,

Stella is on of the best emulator of Atari 2600 game console, running on many different systems, such as Linux, Solaris, Windows, MacOS/X, WinCE, OS/2, GP2X.

It has been written initially by Bradford Mott, see Stella site for details.

Here is a port on Pandora of the version i've previously ported to Wiz.

Many new features have been added compared to original version.

How to use it ? Everything is in the README.txt file.

Here is a full working PND version :
pandora-2600-v1.1.0-pnd.zip

Here is the source code :
pandora-2600-v1.1.0-src.zip

   Enjoy,

      Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

Awesome work on the Pandora!!  I hope to get one when the next batch starts. *crossing my fingers*.  Just wondering your thoughts on the Pandora?

Hi Todd,

It's a very good portable console, the best "open" console i've seen so far,

Zx
