Pandora-OpenSonic : Sonic clone for pandora v1.3

Hi All,

OpenSonic is a free open-source game based on the "Sonic the Hedgehog" universe. It introduces a different style of gameplay called cooperative play, in which it's possible to control 3 characters simultaneously. See <http://opensnc.sourceforge.net/home/index.php> for more details about it.

Thanks to Hitnrun who ported allegro to pandora, i've been able to modify a bit OpenSonic (mainly to get a fullscreen and to add frame skip option) and run it on my pandora.

It might be good to overclock a bit for better performances.

Sources are included, and this package is under the GNU public license, read doc files for more information about it.

Here is a full PND version :

Here is the source code :

Enjoy,

Zx.

PS: This port is dedicated to my son Alex ...

If you want to discuss on this homebrew, you can do it here :
