Caanoo-a7800: Atari 7800 Emulator for Caanoo v1.1.0

Hi All,

ProSystem is the best emulator of Atari 7800 game console, running on Windows system.
It has been written by Greg Stanton, see Greg Stanton web site for details.

Here is a port on Caanoo of the version i've previously ported to Wiz.

I would like to thanks zLouD for his help on Caanoo beta-testing !

Here is a full working binary version :
caanoo-a7800-v1.1.0-bin.zip

The source code is here :
caanoo-a7800-v1.1.0-src.zip

  Enjoy,

     Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

Tried it, runs very good, your Dingoo port of the 7800 emu hadn't played all sound (e.g. music in Ballblazer), this one does, great. Is it possible, that the sound is played a liitle bit to slow? Hard to describe, especially the music in the games sound a little bit strange, but this can also be my imagination. Thanks again.

Hi,

Yes it's possible. It might be due to a sample rate mismatch. I've to test the wiz version to see if it's ok or not.

Thanks for your feedback,

Zx

Another small thing, the compability is not as high as in the Dingoo version of you Emu7800 port, Planet Smashers and Scrayard Dog fail to run, both work fine on the Dingoo.

Hi Dude,

Thanks for your feedback, i will test it better when i will get my caanoo

Cheers,   Zx
