Caanoo-HUGO: PC Engine Emulator for Caanoo v1.1.0

Hi All,

For those who haven't seen previous release, Hu-Go is a famous emulator of NEC PC Engine console, running on many system such as Linux and Windows. (see <http://www.zeograd.com/> for details)

Caanoo-Hugo is a port on Caanoo of my latest PSP version of Hu-Go.

It is a beta, and CD-rom images are not supported.

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public licence v2, read COPYING.txt file for more information about it.

Here is a full working binary version :
caanoo-hugo-v1.1.0-bin.zip

And source code :
caanoo-hugo-v1.1.0-src.zip

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcmu network or <http://www.gp32x.com/>.

Hey, my copy of Hugo on my Caanoo won't load the games. The screen goes blank, then loads the splash page with Bonk, then glitches and returns me to the main menu. Can anyone suggest my next step? Thanks.

Good day, sir. First of all, I'd like to commend you for your efforts as a contributor to the Caanoo's library of applications. It truly makes the Caanoo worth its price.

For whatever reason, it seems like any of the ROMs I try to load are emulated at half the actual speed, and I'm not entirely sure why. Notable examples are games like Override (J). I'm running version 1.6.0, included with my Caanoo.

Blog Export: ZX-81's web site, <http://zx81.zx81.free.fr/serendipity/>

Any recommendations?

Gyridion on Jul 17 2011, 13:02

Any plans to update and add cd rom support? Still a great emu as is though!
