Caanoo-MSX: MSX Emulator for Caanoo v1.1.1

Hi All,

fMSX is a famous emulator of the MSX, MSX2, and MSX2+ 8bit home computers. It runs MSX/MSX2/MSX2+ software on many different platforms including Windows and Unix. See <http://fms.komkon.org/fMSX/> for further informations.

It has been first written by Marat Fayzullin, and later Vincent van Dam ported it on SDL.

Here is a copy of the changelog v1.1.1 :

- USB keyboard support in menu & emulator
- Fix sound speed issue (UPeriod parameter in settings menu)
- Adjust max FPS when changing between PAL/NTSC mode
- Center Help screen
- Remove unused overclock cpu speed parameter

How to use it ? Everything is in the README.txt file.

It's distributed under Marat Fayzullin's license for the original MSX part, and under GNU license for all the GP2X part.

Here is a full working binary version :
[caanoo-msx-v1.1.1-bin.zip](#)

The source code is here :
[caanoo-msx-v1.1.1-src.zip](#)

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or <http://www.gp32x.com/>.

Is this the start of USB keyboard support in all your emulators? I hope so! lol I bow down to you sir in thanks and greatfulness lol
Thank you for the update!

yes, for computer emulators ... for console emulator it is not really useful

Cheers, Zx
