Caanoo-MSX: MSX Emulator for Caanoo v1.1.1

Hi All,

fMSX is a famous emulator of the MSX, MSX2, and MSX2+ 8bit home computers.
It runs MSX/MSX2/MSX2+ software on many different platforms including Windows and Unix.
See http://fms.komkon.org/fMSX/ for further informations.

It has been first written by Marat Fayzullin, and later Vincent van Dam ported it on SDL.

Here is a copy of the changelog v1.1.1 :
- USB keyboard support in menu & emulator
- Fix sound speed issue (UPeriod parameter in settings menu)
- Adjust max FPS when changing between PAL/NTSC mode
- Center Help screen
- Remove unused overclock cpu speed parameter

How to use it ? Everything is in the README.txt file.

It's distributed under Marat Fayzullin's license for the original MSX part, and under GNU license for all the GP2X part.

Here is a full working binary version :
caanoo-msx-v1.1.1-bin.zip

The source code is here :
caanoo-msx-v1.1.1-src.zip

   Enjoy,

      Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

Is this the start of USB keyboard support in all your emulators? I hope so! lol I bow down to you sir in thanks and greatfulness lol
Thank you for the update!

yes, for computer emulators ... for console emulator it is not really useful

Cheers,   Zx
