Caanoo-CAP32: Amstrad CPC Emulator for Caanoo v1.1.1

Hi All,

Caprice32 is one of the best emulator of the Amstrad CPC home computer series running on Windows and Unix, written by Ulrich Doewich. This emulator faithfully imitates the CPC464, CPC664, and CPC6128 models (see caprice32 project)

Here is the change log of this caanoo version :

- Add USB keyboard support
- Center Help screen and fix border screen issue in several menus (text was practically unreadable in rom/disk files requester etc ..)
- Remove unused overclock cpu speed parameter

How to use it ? Everything is in the README file.

This package is under GPL Copyright, read COPYING file for more information about it.

Here is a full working binary version :

caanoo-cap32-v1.1.1-bin.zip

The source code is here :

caanoo-cap32-v1.1.1-src.zip

Enjoy,

Zx.

If you want to discuss on this homebrew, you can do it here :

My forum on dcemu network or <http://www.gp32x.com/>.
