## **PSPMSX: MSX Emulator for PSP v1.0.3 (load any roms !)**

Hi All,

Here is a new version of PSPMSX the MSX series Emulator for PSP.

What's new in version 1.0.3 :

- All roms can now be loaded directly !
- MSX version can be changed inside the emulator  
(no need to rename the rom as carta.rom etc ...)
- Fix a bug in sound startup

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public licence,  
read COPYING.txt file for more information about it.

pspmsx-v1.0.3.zip

Enjoy,

Zx.

joysticks are not mapped correctly, they don't even respond

First of all, thanks for your feedback

You can change the mapping using the keyboard menu inside the emulator menu ... Joystick works properly for me ... Can you tell me the name of the game you've tried ?

Yes, when you play ---Mobile Planet Suthirus---, you cannot enter the door. for instance, when you play FMSX 0.62b, Joysticks are properly mapped and the second button respond perfectly. Actually, only the keyboard is mapped in PSPMSX, and some keys lack. I can prove it, just play athletic land, choose 1 at the menu to play with joysticks, and You'll see that you can't even move. Please, try to add Vsync and triple buffering too...

Thanks.

Hi,

If you have a 1.5FW you just have to copy the content of the two fw1.5/pspmsx and fw1.5/pspmsx% directories on your memory stick (in psp/game/pspmsx and psp/game/pspmsx%).

If you have a 2.x FW (up to 2.6) then copy only the directory fw2.x/pspmsx on psp/game/pspmsx

oh...

but I have update my psp to version 2.71, how can I play pspmsx now?

guran on Jun 14 2006, 09:23

Homebrew don't work on FW >= 2.7

zx-81 on Jun 14 2006, 10:36

can I delite 2.7 or are you want to do a new version of pspmsx so I can play it on 2.7???

guran on Jun 14 2006, 11:19

unfortunately no ...
