JXD-CAP32: Amstrad CPC emulator for JXD and G18

Hi All,

Here is a new version for JXD S5110 & JXD S601, and now G18 android consoles.
The touchscreen is supported, but not everywhere.

How to use it ? Everything is in the README file.

This package is under GPL Copyright, read COPYING file for more information about it.

Changelog :

- Add more render modes + delta Y (better to play games such as Arkanoid)
- Touch screen support in most of all menus
- JXD + G18 support
- Speed limiter accuracy improvement
- Frame skip used now a 1/50 sec step (more accurate)
- Fix Sound issues (due to bad SDL implementation on Android)
- Fix several other bugs (snapshot images display etc ..)

Apk :

android-cap32-v1.1.1-apk.zip

Source code :

android-cap32-v1.1.1-src.zip

Enjoy,

Zx

Salut Zx !

Je voulais savoir si tu avais prévu d'intégrer un joystick virtuel, car ça fonctionne très bien sur mon galaxy note à part que je ne vais pas très loin une fois le disk lancé...

En tout cas merci de porter tes programmes sur tous ces supports depuis tout ce temps !

Hi

I've been using your emulators for years and I have just bought a gpd xd., The reason I have contacted you is if you are planning to release a amstrad emulator for the gpd.

I have tried the jxd amstrad emulator on the gpd xd and it works but the controls do not, so I was wondering if you have any plans to release it in the future for the gpd xd.

Thank you

Dean

Dean on Apr 7 2017, 21:04

Hi Dean,

Sorry for the late answer. I have no gpd xd so I am not able to adapt the control keys ...

Regards, Ludo
