PSPAtari: Atari 800/130/5200 Emulator for PSP v1.0.2 (sound)

Hi All,

Here is a new version of PSPAtari the emulator of Atari 800, 800XL, 130XE and 5200 series.

What's new in version 1.0.2 :

- Sound support
- Add various render modes (normal/fit/x1.25 ...)
- Code cleaning and bug fix
- New virtual keys

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license,
read COPYING.txt file for more information about it.

pspatari-v1.0.2.zip

  Enjoy,

      Zx.

PS For those who wonder how to use 5200 Roms :

You have to load them using the original atari800 emulator menu (the yellow "Atari800 menu"
option in the emulator window).

Then select "Cartridge management" then "Insert cartridge" and specify your disk image file,
then choose the cartridge type 5200, and go back to the emulator using LTrigger.

The PSP Atari is great. Any chance to get the sound improved? Is that problem of the SDL sound support or is it somewhere in the emulation code?
Anyway, you did rally good job! Please keep up improving this emu.

Como se llama ese juego?

What is the name of that videgame?
