### **PSPSIM: A SamCoupé Emulator for PSP v1.0.3**

Hi All,

Here is a new version of PSPSim the SamCoupé Emulator for PSP.

For those who haven't seen previous versions, SimCoupe emulates a SAM Coupe - an 8-bit, Z80-based home computer released in 1989 by Miles Gordon Technology.

For more information on the machine itself, including history and technical specification you can go on the SimCoupe web site.

**\*\* Many thanks to Mr Nick666 for his graphics and settings files \*\***

What's new in version 1.0.3 :

- Icons and background images designed by Mr Nick666
- Emulator menus reorganisation (new menu for settings)
- The percent of battery left is now displayed in the emulator window
- Add a watchdog to automatically return to the emulator menu when the battery is very low (< 5%)
- New feature to save and load a distinct setting file for each games
- Add keyboard change skin option  
(you can add your own virtual keyboard images in the graphics directory).
- Delete files option (in the file selector)
- Screenshots are now saved in PNG format instead of BMP

How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public license, read COPYING.txt file for more information about it.

pspsim-v1.0.3.zip

Enjoy,

Zx.

If you want to discuss on this emulator, you can do it here :
