PSPZX81: A Sinclair ZX81 emulator for PSP v1.0.1

Hi All,

XZ81 is an emulator of the Sinclair ZX81 computer running on Unix systems.
It has been written by Russell Marks in 1995.
See http://rus.members.beeb.net/ for further informations.

I've sucessfully modified, and port the source code of the version 2.1 of xz81
and it's now working fine on PSP !

It has been developped on linux for Firmware 1.5, and 2.1+ using DevHook
and the two great GTA eloaders (0.97 and 0.98) from http://www.fanjita.org/.

How to use it ? Everything is in the README.txt file.

If you're looking for a manual or documentation for the zx81 itself have a look here :
http://www.zx81kit.com/

If you're looking for games and software have a look here :
ftp://ftp.nvg.ntnu.no/pub/sinclair/

Sources are included, and this package is under the GNU public licence,
read COPYING.txt file for more information about it.

pspzx81-v1.0.1.zip

Special thanks to all PSPSDK developpers.

  Enjoy,

    Zx.

this is a cool HB, I miss this machine so much, thank you for the updates
   Yh on Sep 18 2006, 16:19

This is cool and all, but how abaout working on something more useful and up to date.
   jk rowling on Sep 18 2006, 21:04

Excellent work - Mazogs on the move - fantastic!
