How to use it ? Everything is in the README.txt file.

Sources are included, and this package is under the GNU public licence v2, read COPYING.txt file for more information about it.

Work still remain to support cd.

It has been written many years ago by Eddie C. Dost in C langage.

The package is under GPL Copyright and sources are included.

Pandora X48 v1.0.0 binary version only

The HP48 documentation is there : user guide
