Here is a linux SDK for the Wiz

Hi all,

Some of you asked me for a tar ball of the SDK i use for my Wiz developments & ports.
So here is my SDK for fedora core (but it should work for other linux distro) :

wizdev-20100805.tar.bz2 or wizdev-20100805.tar.bz2

This package is a bit old (it doesn't include latest SDL lib versions etc ...) but it should be good enough to start.

You may add the following lines in your bashrc :

```
export OPENWIZ=/usr/local/wizdev
export WIZDEV=$OPENWIZ
export PATH=${PATH}:${OPENWIZ}/bin
```

Hope that helps,

Zx

If you want to discuss on this package you can do it here :
My forum on dcemu network or <http://www.gp32x.com/>.
