Pandora-Simutrans : Transportation simulation game for pandora

Hi All,

Simutrans is Transportation simulation game that runs under many system such as linux and windows.

In Simutrans you can build the transport networks you always dreamed of, with platforms, quays, level crossings, bridges, tunnels, signals and much more. Transport passengers between nearby cities with a commuter train or use a high speed train to earn big money by connecting cities further apart.

See http://www.simutrans.com/ for more details.

After minor changes in the makefile, here is a port on pandora of the latest linux version v102.2.2

Here is a pnd version :
simutrans-102.2.2.pnd

Here is the source code :
simutrans-v102.2.2-src.zip

Sources are included, and this package is under the artistic license, read doc files for more information about it.

 Enjoy,

     Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.
