Caanoo-IRSSI : IRC Client for Caanoo

Hi All,

Here is a version for the caanoo of the famous IRC client IRSSI. It's launched using a patched version of the terminal emulator termlua2x.

This package is under GPL Copyright, read COPYING file for more information about it.

Binary version :
caanoo-irssi-bin.zip

Source code :
caanoo-irssi-src.zip

PS: I have confirmation (thanks to BAFelton) that this new version is working fine with fw 1.5.0

For those who didn't know, once you got irc working on your caanoo with irc, you can also use msn/yahoo tchat with bitlebee (gateway from irc to msn/yahoo)
see <http://www.bitlbee.org/main.php/news.r.html>

Enjoy,

Zx

If you want to discuss on this homebrew, you can do it here :
My forum on dcmu network or <http://www.gp32x.com/>.
