Wiz-TI99: A TI-99 emulator for Wiz v1.1.0

Hi All,

TI99Sim is a very good emulator of Texas Instruments TI99 home computer
running on Windows and Unix. The emulator faithfully imitates the TI99/4 model
(see http://www.mrousseau.org/programs/ti99sim/)

Wiz-TI99 is a port on Wiz of the version i've previously ported to PSP.

Many new features have been added compared to GP2X-F100 version.
Here is a copy of the changelog :

- Cheat support !
- New background images
- Text editor to write your own comments on games
- Text editor to modify the global cheat.txt file
- Display first comment line while browsing game files
- Memory monitoring engine to find your own cheat code !
- Improve file requester with virtual keyboard to choose
  sequentially rom files beginning with a given letter
- Add documentation for settings in help menu
- A thumbnail image is now displayed in the file requester
  while selecting any file with the same name of a previously
  saved game (cartridges, keyboard, settings).
  It might be very helpful to recognize that game later if you
  have thousand different games on your cartridges folder !

How to use it ? Everything is in the README.txt file.

If you want to convert games etc ... have a look to Ti99/sim web site
for more informations (http://www.mrousseau.org/programs/ti99sim/).

You can give a try to the cartridges package :
here

Sources are included, and this package is under the GNU public licence,
read COPYING.txt file for more information about it.

Here is a full working binary version :
wizti99-v1.1.0-bin.zip

Here is the source code :
wizti99-v1.1.0-src.zip

** This port is dedicated to my good friend Buzz **

  Enjoy,

      Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.
