Caanoo-CAP32: Amstrad CPC Emulator for Caanoo v1.1.0

Hi All,

Caprice32 is one of the best emulator of the Amstrad CPC home computer series running on Windows and Unix, written by Ulrich Doewich. This emulator faithfully imitates the CPC464, CPC664, and CPC6128 models
(see caprice32 project)

Here is a port on Caanoo of the version i've previously ported to Gp2x-Wiz.

I haven't any Caanoo, and i would like to thanks Pedro De quintana for his help on Caanoo beta-testing !

What's new compared to original Caprice32 project :

- Cheat support !
- Memory monitoring engine to find your own cheat code !
- Text editor to modify the global cheat.txt file
- Text editor to write your own comments on games
- Display first comment line while browsing game files
- Auto disk startup support
- Save state in gzip format
- etc, etc ...

How to use it ? Everything is in the README file.

This package is under GPL Copyright, read COPYING file for more information about it.

Here is a full working binary version :
caanoo-cap32-v1.1.0-bin.zip

The source code is here :
caanoo-cap32-v1.1.0-src.zip

  Enjoy,

     Zx.

If you want to discuss on this homebrew, you can do it here :
My forum on dcemu network or http://www.gp32x.com/.

Caanoo-Colem: Colecovision emulator for Caanoo v1.1.0

Hi All,

ColEm is one of the best emulator of the ColecoVision videogame system running on FreeBSD, HP-UX, SunOS, Solaris, Linux, and other Unix systems. There are also ports to MacOS, MSDOS, Windows, OS/2, PocketPC and other systems. See http://fms.komkon.org/ColEm/ for further informations.

Caanoo-Colem is a port on Caanoo of my previous Wiz port version of ColEm.

I haven't any Caanoo, and i would like to thanks Pedro De quintana for his help on Caanoo beta-testing !

Sources are included, and this package is under the GNU public license,
read COPYING.txt file for more information about it.

Here is a full working binary version :
caanoo-colem-v1.1.0-bin.zip

The source code is here :
caanoo-colem-v1.1.0-src.zip

Enjoy,

    Zx
