Wiz-Vectrex : Vectrex Emulator for Wiz v1.1.0

Hi All,

VecX emulates the Vectrex game console on systems such as Linux and Windows. It has been written by Valavan Manohararajah.

Wiz-Vectrex is a port on Wiz of my latest caano0 port version of VecX.

What's new compared to original version :

- Major speed improvements :
 - + 6809 emulation
 - + vector rendering
 - + remove vector cash (buggy and time consuming)
- Sound emulation completely rewritten and inspired from 8910 driver of xname.
- The rotate 90' view is now much faster and it is used as default render mode.
- Save state modification, it is now faster to save state (but previously saved games are not compatible with this new version !)
- Add .vec and .gam file extention as valid rom extention
- Add option to change color between gray and blue

Here is a full working binary version :

And source code :
wiz-vectrex-v1.1.0-src.zip

Enjoy,

Zx.
